The environment you create around you speaks volumes about you and your personality. Whatever you want to express, we're determined to give you the means to do it perfectly.

## WHY CHOOSE MELAWOOD?

With over a hundred and twenty years of history behind us, you can be sure that PG Bison manufactures MelaWood with the kind of technology and know-how that'll guarantee it lasts and lasts. Whether it's a small piece of furniture, your dream kitchen or a whole office block, we've got the right design for you with back-up you can trust. And that means your investment will keep paying dividends for a long time to come.

# LET YOUR INNER STYLE SHOW

## MELAWOOD IS BEAUTIFUL BUT OH SO TOUGH

Once our designs have been carefully selected, then printed décor paper is saturated with melamine resin. This is fused to our top quality board using heat and pressure, creating a surface tough enough to last a lifetime.

On a more practical note, this process ensures a moisture and stain resistant surface that is hygienic and food safe. And ridiculously easy to clean.

*\*We offer a wide range of designs in combination with our finishes. We have highlighted the finish that we think best showcases each design to help make your choice easier. Contact your stockist if you have a particular request.*

## **NOT JUST HOW IT LOOKS** HOW IT FEELS

Our experience of an environment is not only visual but textural as well. A high gloss surface gives colours a richer, more vivid look. Conversely, a matt texture absorbs more light so it softens colours and can give a sense of warmth. And of course, an undulating three dimensional texture provides an authentic, warm feel.

Our range of textures and finishes give you complete freedom of choice to express yourself as you like in the most beautiful and practical way.

**FUSION** – an elegant, matt wood-like effect, using soft, shallow pores to enhance its realism.

**LINEAR** – combines matt and gloss straight grains to create a lively texture.

**NATURAL TOUCH** – a soft matt for a luxurious feel.

**PEEN** – a practical, hardworking, stippled effect.

**ASHWOOD** – a glossy, debossed woodgrain.

**LINEAR**

**FUSION**

**ASHWOOD**

**PEEN**

You are you. And when you're creating a working, living or playing environment, the designs and colours you choose help express your authentic self. But why stop there? Why not add a distinctive personal signature by choosing one of our three unique, premium finishes.

## SUPAGLOSS

The glass-like surface of MelaWood SupaGloss reflects light perfectly and evenly, giving a crisper, more vivid appeal. Colour seems richer and the design itself takes on a new clarity. And yet SupaGloss is still super tough too. Most minor scuffs can be polished away, so your surface always looks remarkable.

**SG SUMMER WHITE**

## SUPAMATT

This luxurious finish feels almost silky to the touch. As the name suggests, it's a super matt finish that soaks in light giving surfaces a softer, warmer radiance. Thanks to a special hi-tech coating, MelaWood SupaMatt surfaces are oblivious to finger prints, so they always have a just-cleaned look. Like all MelaWood finishes, SupaMatt is easy to clean, tough and practical.

**SM** SUPER BLACK

**SM** STORM GREY

**SM** ICEBERG WHITE

## SUPATEXTURE

There's something about wood that appeals to our primal selves. The grain, the roughness, the natural patterning. We've invested heavily in developing technology that brings a truly authentic feel to our MelaWood SupaTexture range of designs. Your eyes will tell you it's real and now, so will your sense of touch.
